SUMMARY

A passionate Computer Science undergraduate with a strong interest in Data Analysis and Web Application Development. Eager to apply technical skills in innovative projects and continuously expand knowledge in cutting-edge technologies.”

WORK EXPERIENCE

Anvaya Minds (Website Development - UI) Feb 2025 - present

- Specialized in web design and optimization for better UX, accessibility, and performance. Skilled in HTML, CSS, JavaScript, React, and UI/UX frameworks. Experienced in usability testing and cloud deployment (AWS, Docker). Passionate about AI-driven automation and data insights to boost user engagement.

Oasis Infobyte Feb 2025 - present

- Completed an internship, gaining hands-on experience with industry-relevant projects, cutting-edge technologies, and development frameworks. Worked on real-world applications, enhancing skills in software development, data analysis, and cloud computing while collaborating in an agile environment.

Edunet Foundation (Artificial Intelligence) June 20204 - July 2024

- Developed an Employee Burnout Prediction model using Linear Regression, analyzing workplace factors to identify risks. Utilized Python, SQL, Scikit-learn, and TensorFlow for data processing, model training, and predictive analysis, enabling proactive employee well-being strategies.

PROJECTS

recipe oasis

Designed and developed a responsive recipe website using HTML, Bootstrap, and JavaScript. Created an intuitive interface for browsing, searching, and filtering recipes, enhancing UX with interactive recipe cards and ingredient lists..

Hybrid Scheduling

Developed a hybrid CPU scheduling algorithm combining Round Robin and Priority Scheduling. Built the UI with HTML, CSS, and Bootstrap, and implemented scheduling logic in JavaScript. Integrated preemptive execution for efficient task management and used sorting algorithms with time quantum logic to prevent process starvation.

Online Banking System

Designed a console-based banking system that manages user accounts, processes transactions (deposit, withdrawal, transfer), and generates account statements. Incorporated security features and efficient data handling with file storage

EDUCATION

2022 - 2026	Bachelor of Technology in Computer Science at SRM University	(7.96)
2020 - 2022	Class 12th at Sri Prakash Vidyaneketan	(84.5%)
2020	CBSE Class 10th at Sri Prakash Vidyaneketan	(83%)

CERTIFICATIONS

Cisco Data Analytics Essentials Certification Feb 2025

- Gained expertise in data analytics with SQL, Python, and visualization tools, implementing machine learning algorithms, statistical analysis, and business intelligence solutions. Worked on hands-on projects focused on data mining, warehousing, and process optimization to drive actionable insights.

SKILLS

Technical Stack	C, C++, AWS, Java, CSS, HTML, Javascript,python React.js,
Databases and AI/ML	MySQL, TensorFlow.
Microsoft Office	Microsoft Excel, Power BI, Microsoft Word and Microsoft Powerpoint
